

Epac Series 3000

a Division of Harford Industries

US Patent No. 6.820,347 B2

The world's finest PC based Electronic Micrometer

*In the Epac tradition,
The Epac Series 3000 combines
state-of-the-art technology with
solid advances in engineering
to bring you a roll micrometer
that measures*

*Roll diameter
Roll profile
Roll surface temperature*

*And provides a colored printout
Of all 3 functions on the same page!*

You can rely on Epac's leadership in PC based design to provide

- *Sophisticated data acquisition and transfer to help you meet and document your quality standards*
- *NIST traceable certification to document rigorous quality control*
- *Consistently accurate readings with Epac's unique rigid construction and state-of-the art technology*
- *Operator safety with Epac's patent-pending compact and light-weight design*
- *Easy operation with Epac's user-friendly touch screen design*
- *Optional calibration program, saving you the money and time of sending your unit in for calibration*
- *Complete onsite service programs throughout North America for your convenience*
- *Ongoing program of research and development, applying the latest advances in technology to Epac's upgrades*
